Last year\'s (2009\'s) elections showed us quite clearly that there is a real unscrupulousness among people with regard to the elections. There were many extremely questionable acts by people during the elections. If people, such as myself, remain banned from participation in the stations--and, I am banned as are most of the banned at WBAI) for no reason other than that we are politically dissenting from the current management and the way it came to control Pacifica and the stations--than it must be expected that dissenters will not have the sort of access to the technology used for such a system as you are asking about here, so that they can inspect it and its use properly. Our failure to allow ANY manual recounts in the last 5 KPFK LSB elections points that way. KPFK could have cut it\'s use of electricity from 25% too HALF with off-the-shelf changes in the last 5 years, and saved $100,000 to $300,000 in electric bills, also saving the 20 gallons of water used to deliver each killowatt. The money Pacifica spends on achieving fair and open Governance, and on electing listeners, is the most important listener money we spend. \Green Election\" is a straw man.

Second, Pacifica stations have provided alarming coverage of what happens across our nation when there is electronic voting without a paper trail. Please use paper ballots. KPFA	No	Yes	Yes	On KPFA this morning they said they’d like listener input about elections, so… I’m in favor of anything that can reduce the cost up to and including doing away with paper ballots or elections entirely, especially if there is still some way to give input (i.e. on-line comments). I’ve listened for several years now (maybe 8-10 years) and I’ve given money multiple times but always found that the elections (much like all local elections) are not something I feel comfortable making decisions about because I don’t feel I have much info. Yes, you put statements on-line but a few paragraphs don’t necessarily give me enought destinction about someone’s background and specific plans for the station (not anyone’s fault). So, I’ve only returned one ballot in several years of eligibility because I don’t want my uninformed vote to tip the scales… I wish the uninformed/ignorant would not get involved in politics so I don’t want that to be me! KPFA	No	Yes	Yes	I prefer paper ballots, but want to save Pacific money--you need all you can get! And access to additional candidate information online is a definite plus, since I often feel like I don\'t know enough about the candidates, or the issues facing the board, to make an informed choice. Thank you.	Yes - I am a cur
WPFW	No	Yes	Yes	I agree with the member who says they would prefer getting an electronic ballot that we can print out ourselves, fill out and (snail)mail back to the Pacifica station. This way there would be a paper trail. An all-electronic ballot would be too disposed to potential technical and other problems. The ballot should be designed so it cannot be filled out electronically. Candidates\' profiles would be fine online as long as they are printable as someone else mentioned.	Yes - I am a cur

KPFA	No	Yes	Yes	The link to opting out of a paper ballot needs to be more obvious. Green Survey doesn\'t quite do it. I\'m concerned about lack of participation in KPFA LSB elections. I think simplifying this process (for example, electronic voting) might increase participation. However, please continue to also provide a paper ballot for those without internet access or who prefer to vote in that way.	Yes - I am a cur

KPFK	No	Yes	No	Considering the problems there are with different factions running for the board elections an electronic election system would be a disaster. WPFW	No	Yes	Yes	I would be happy to use an electronic ballot. The key is to be reminded to do it. I am busy and often forget about the election except when reminded on the air. I\'m often not in front of the computer when I listen to the radio. Asking someone to go online or just sending them one email won\'t be enough. Multiple reminders need to be sent via email. WPFW	No	Yes	Yes	I strongly favor anything that will reduce the stations\' cost and the environmental impact of running elections and other business. For these reasons I have for years eliminated mail billing and payment and other paper-based transactions wherever possible. It will be important that you clearly and prominently assure listeners of the integrity of the electronic voting process. Many people are still distrustful of the Internet.	Yes - I am a cur
